TECHNICAL SKILLS: React, Redux, JavaScript, Express.js, Node.js, Ruby, Rails, SQL, HTML5, CSS3, AWS

PROJECTS:

ViewTube React, Ruby on Rails, JavaScript, Redux, PostgreSQL, CSS3, AWS S3, HTML [Live Site](#) | [Github](#)
A full-stack web application that mirrors the functionality of YouTube and utilizes CRUD features for video sharing.

- Integrated backend Rails Active Storage with AWS S3 to improve server load and ensure future scalability.
- Constructed streamlined Redux state utilizing custom JSON responses built with Jbuilder allowing the easy addition of new features such as comments and likes on videos.
- Implemented seamless UI/UX design using React and CSS to make navigating the functionality of each feature easy and intuitive.
- Created a secure user authentication process using BCrypt technology to ensure the user is safely logged in and stays logged in throughout their session.
- Built a Rails custom route and controller method in order to simulate Google's two-step signin process. This process validates your email and password to keep your account secure.
- Integrated Redux with HTML5 media web components to create customized media playback for users.

Danceability Data Visualization Express.js, JavaScript, Spotify API [Live Site](#) | [Github](#)
A single-page app that makes secure HTTP requests to Spotify's API and displays user's Spotify track data using d3.js.

- Utilized the RESTful route conventions to create routing in Express.js that allows a user to login to their Spotify account and see their data with a click of a button.
- Engineered JavaScript promise chains that allows an authenticated user to retrieve their music data using the Spotify API and display it in an attractive visualization.

EXPERIENCE:

Executive Assistant

Oct 2018 - Aug 2019

Scholastic

New York, NY

- Managed dozens of invoices and contracts from over 15 service providers using Cognizant's Catalyst Accounts Payable system making sure the invoices were paid and contracts up to date.
